

Affordable Cutting Edge

Corporate Presentation

Our Concept

- **01** Founded by Engineers
- **02** Values (Flexibility, Trust, Effectiveness)
- **03** Solutions Oriented
- **04** Value Added Distributor
- **05** Method (Specialization, Improvement, Innovation)
- **06** Motto (Affordable Cutting Edge)

It's Been a Long Journey for us

Serve with heart, no matter what

NSS has been created by a group of enthusiasts in IT innovation with a primary focus in IT Integrated Solutions and Services.

**JUNE
2005**

We started in a basement,
with only 3 persons

**DEC
2005**

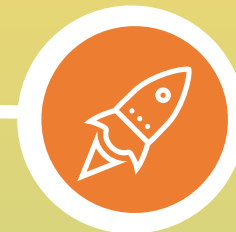

We became 5 people in
December

**DEC
2007**

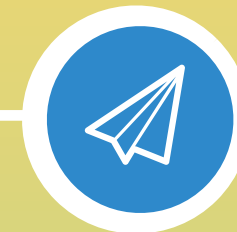

Have moved to NEW
OFFICES being 8 people

**JAN
2008**

Becomes a TRUE 100%
Value Added Distributor
Selling ONLY Indirectly

**MAR
2008**

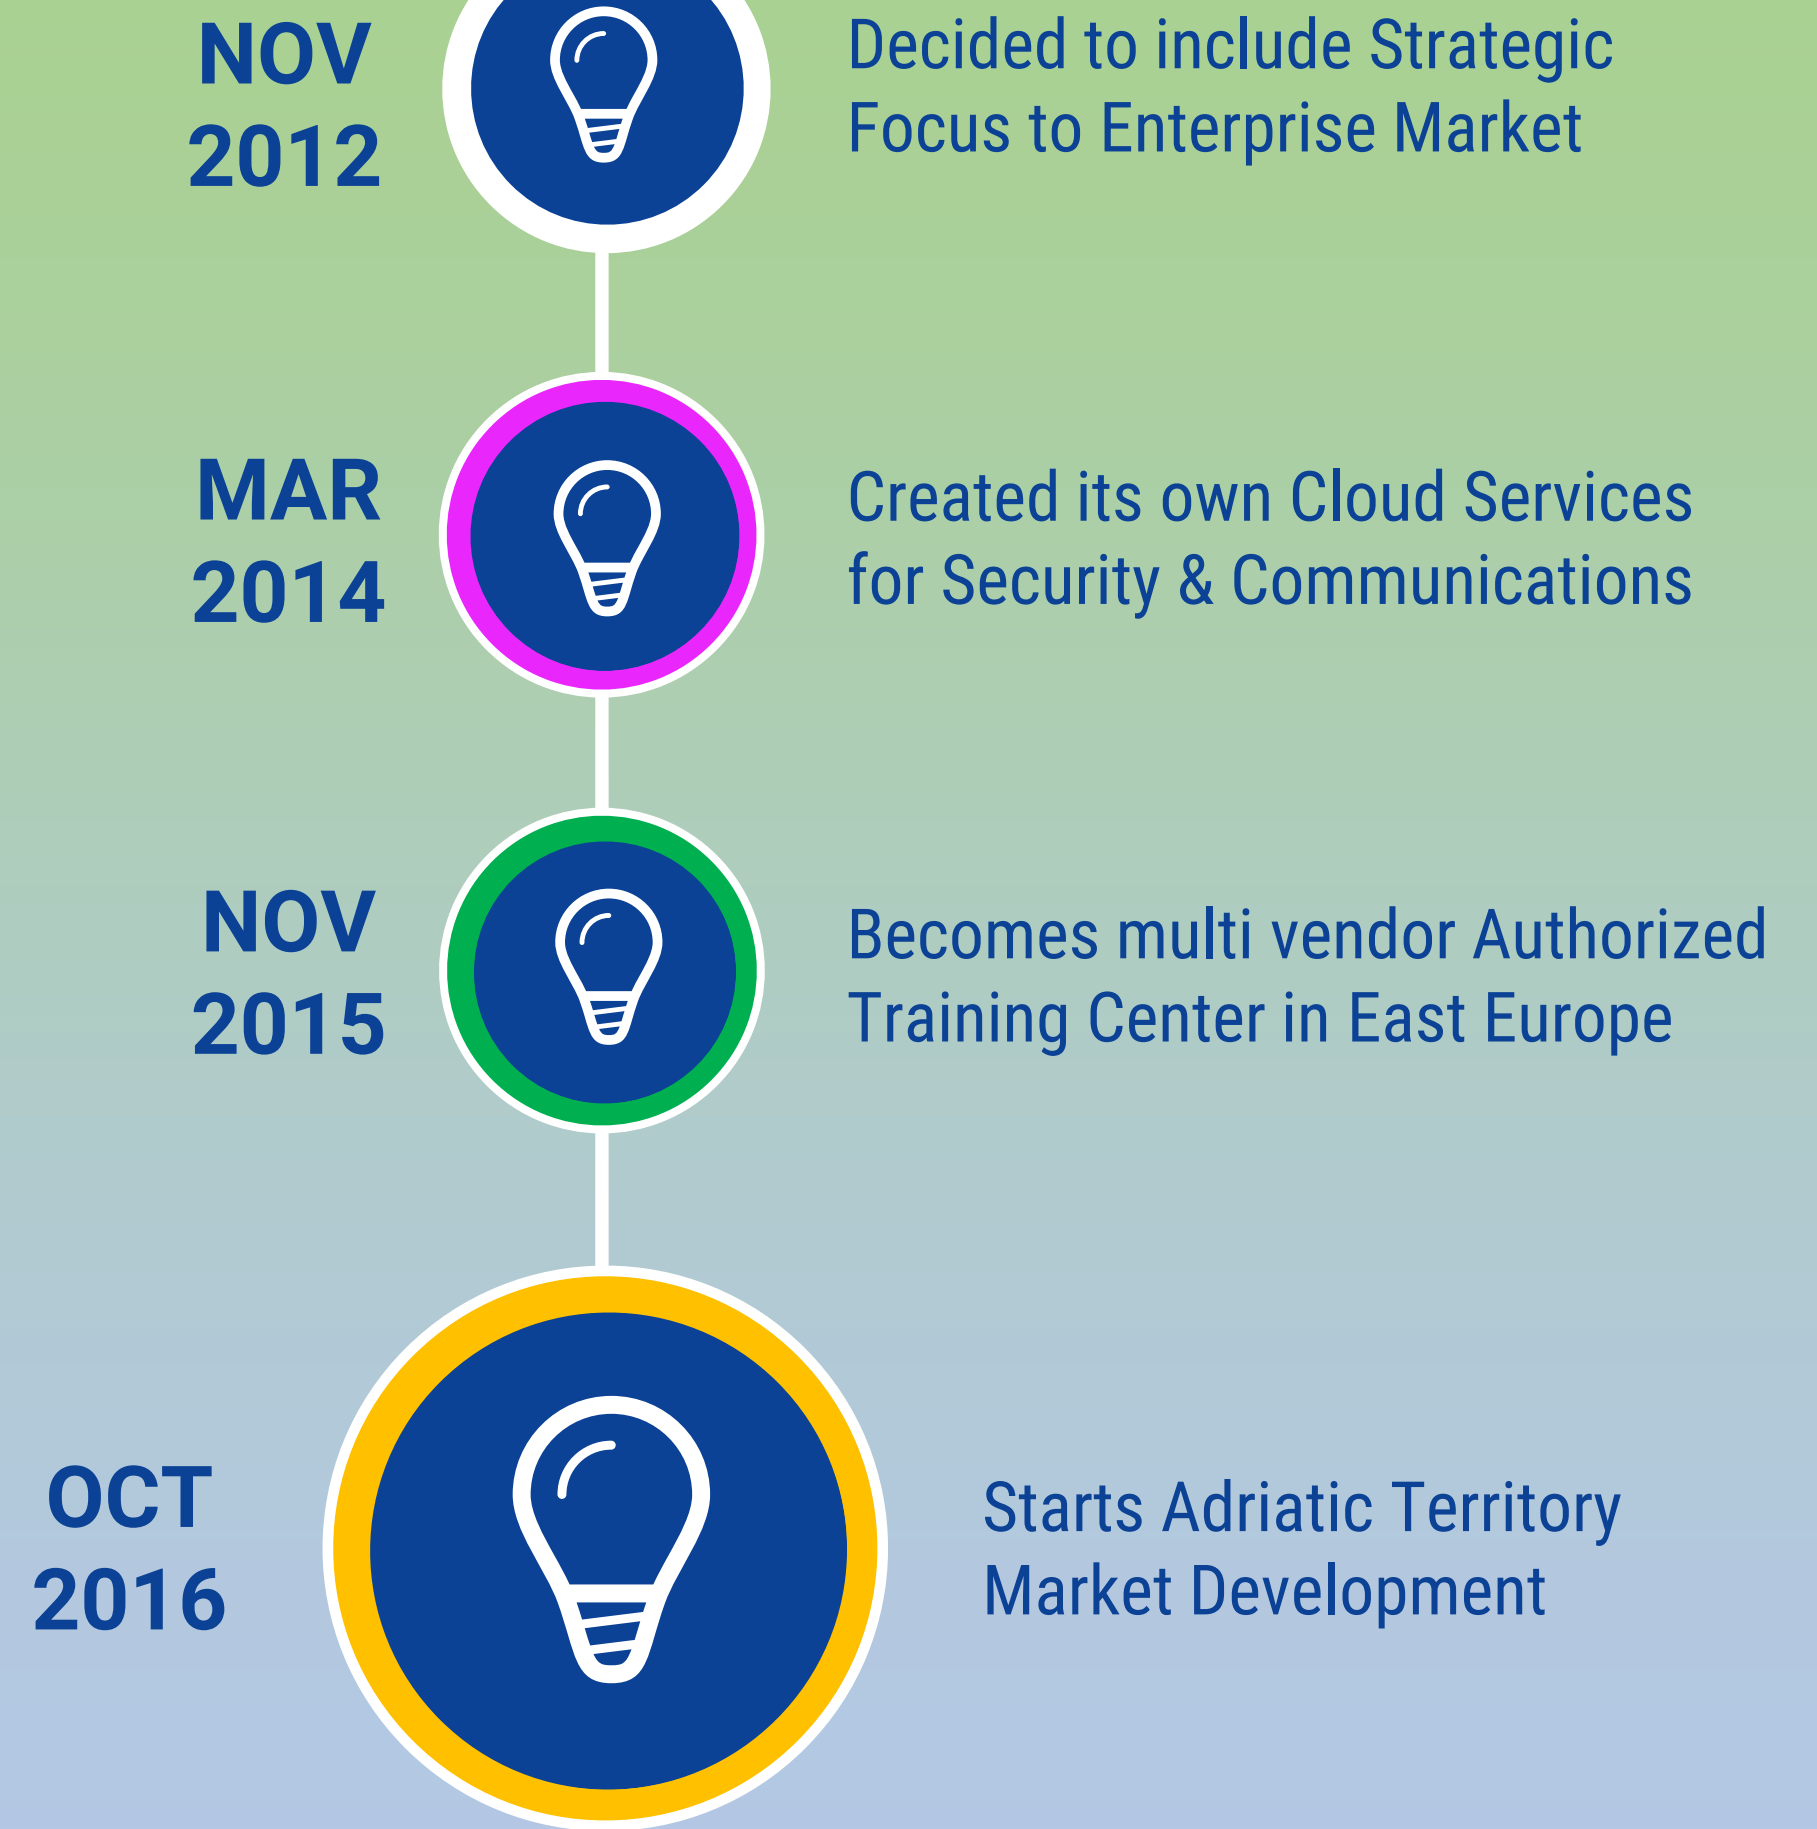

Have started our first
EXPORTS in Cyprus

**NOV
2011**

Becomes SOPHOS Distributor
focused in the area of SE Europe

We Love to Work We Know Our Job

Serve with heart, no matter what

NSS is a true Value Added Distributor investing in KNOWLEDGE whereas stocking distributors invest in Inventory.

We are an active TRAINING & SUPPORT Center officially for all of our Vendors

MAY
2017

Started actively the development of the MSP Market & Channel

NSS is a neutral & knowledgeable VAD in the area of **Southeast Europe**, working with all the important System Integrator Partners in **13 Different Countries**

Our Added Value

Strategize
Provide Strategic
Guidance & Advice

Design
Plan & Architect
Turnkey Solutions

Implement
Integrated Technologies
according to Customer
Preferences

Educate
Train the Reseller
Workforce and create
Field Engineers

Support
Maintain & Support
Ongoing Operations

NSS Data Assurance Policy

NSS places a high level of importance in protecting the data of the company and its customers as well as ensuring the quality of service it provides, according to the standards of ISO 27001:2013 and ISO 9001:2008 respectively.

NSS Quality Objectives

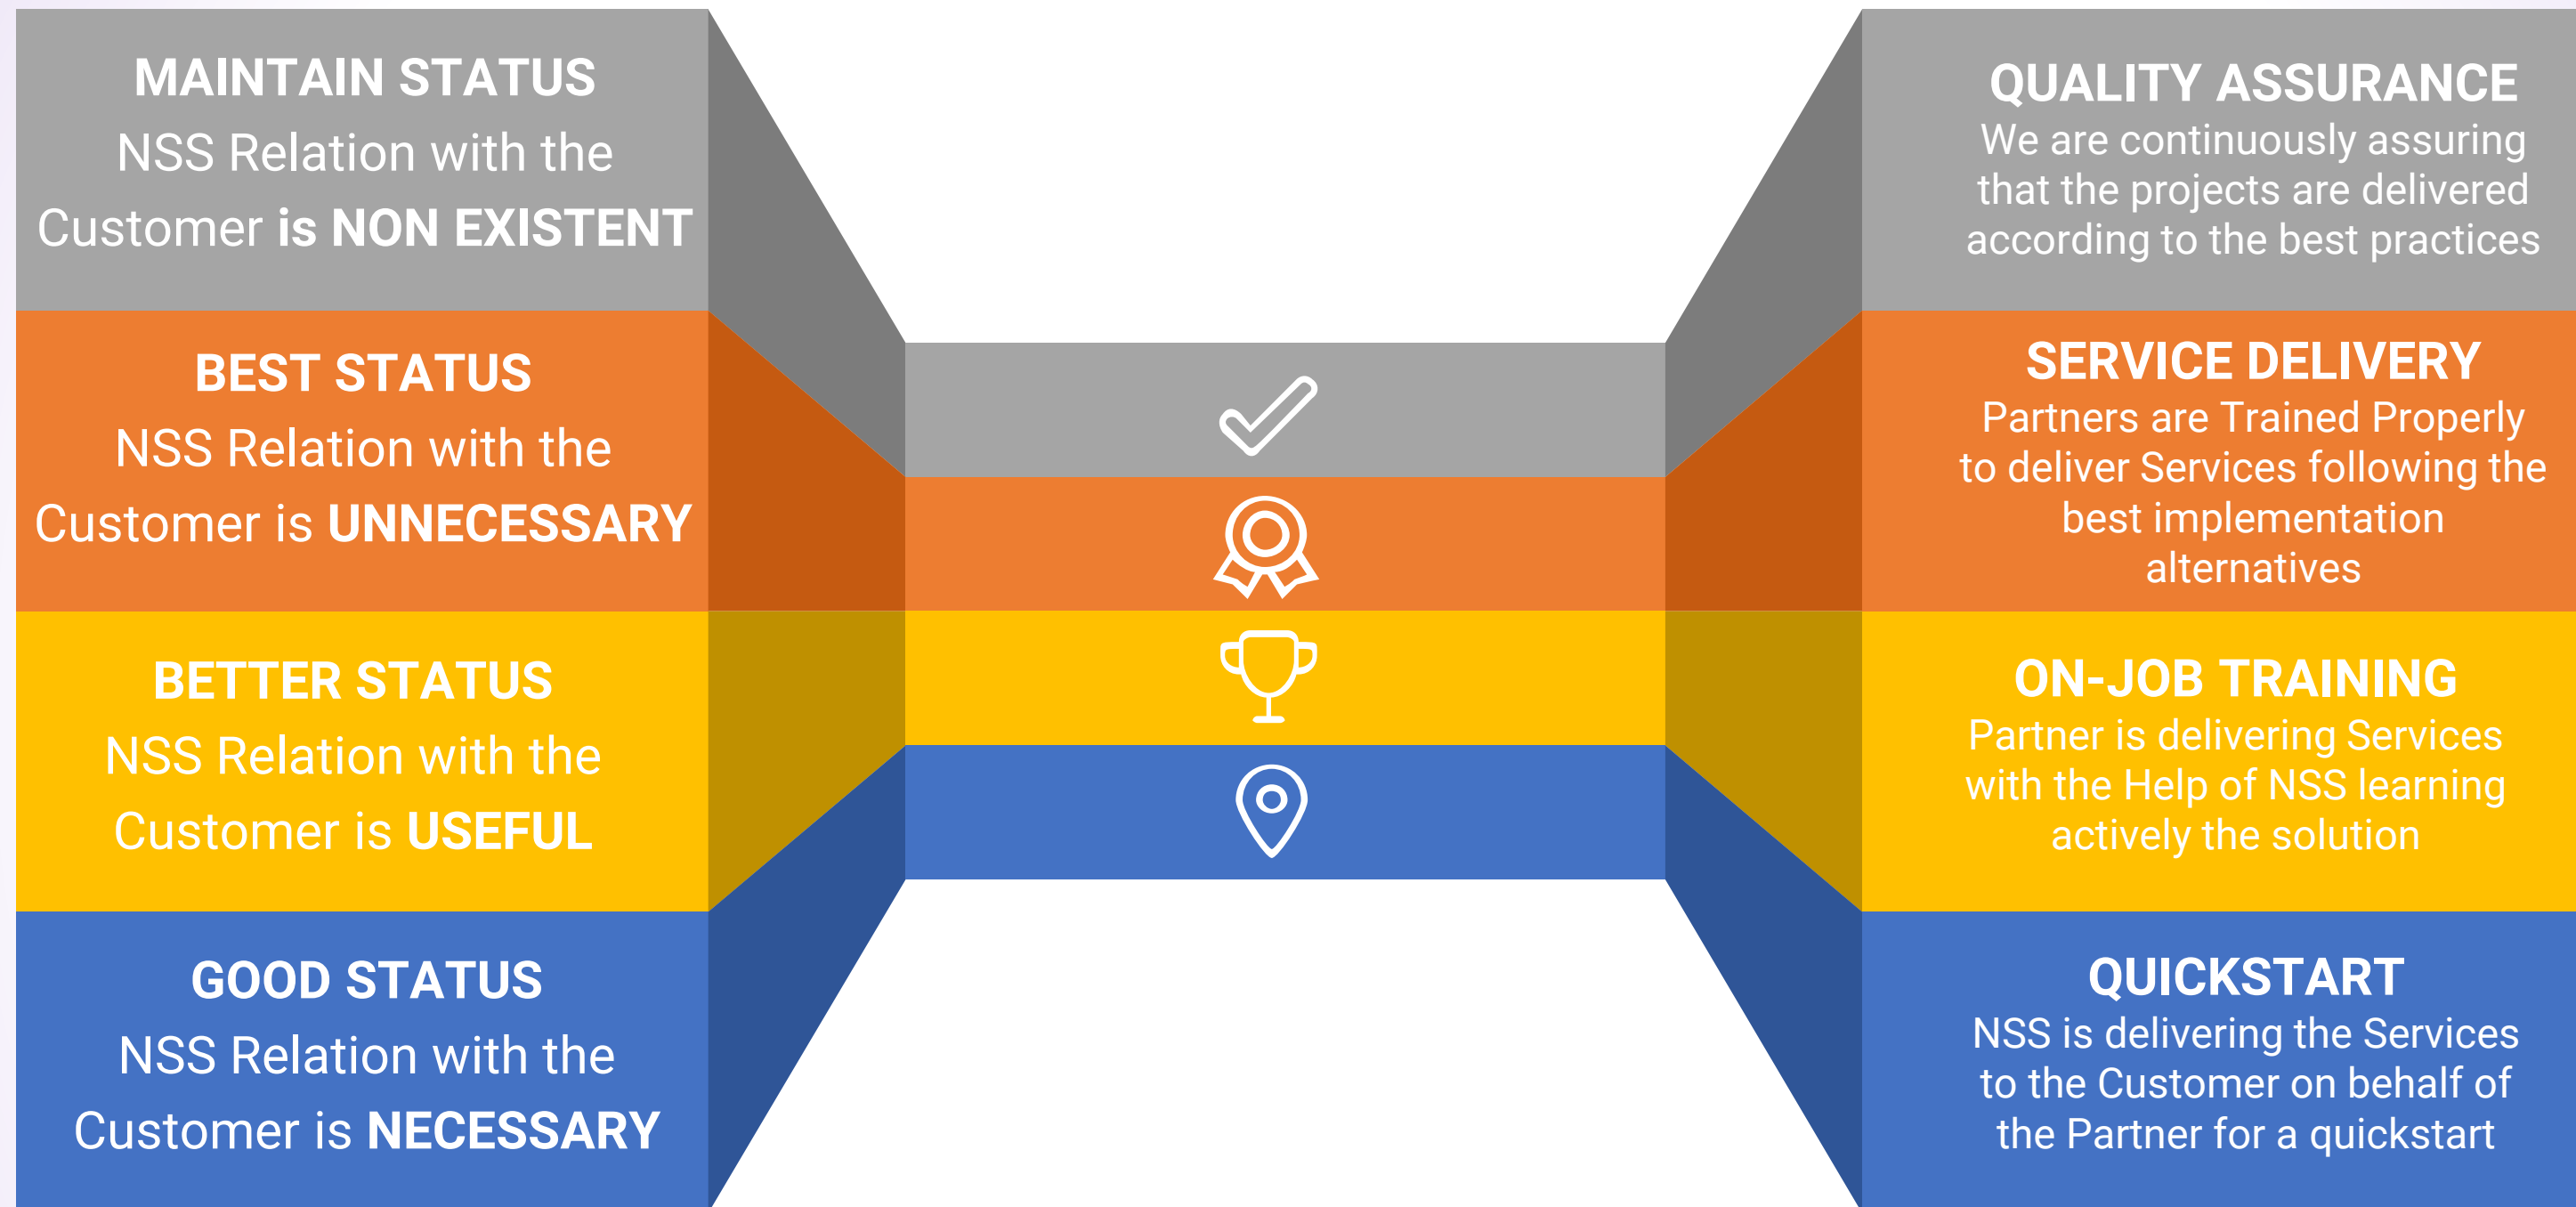

- ★ Absolute specialization in the fields of its business activity.
- ★ Continuous qualitative and quantitative improvement of the quality of products and services.
- ★ Modern and responsible treatment of all customers needs.

Countries of Engagement

Service Delivery Process

“We believe that Professional Services Quality is one of the most important aspects in successful business activities. We continuously try to leverage our partners’ skills by continuous training, so that they can deliver excellent field services and ensuring successful implementations at the same time”

NSS products are
always following the
Affordable Cutting
Edge principle

Synchronized Security

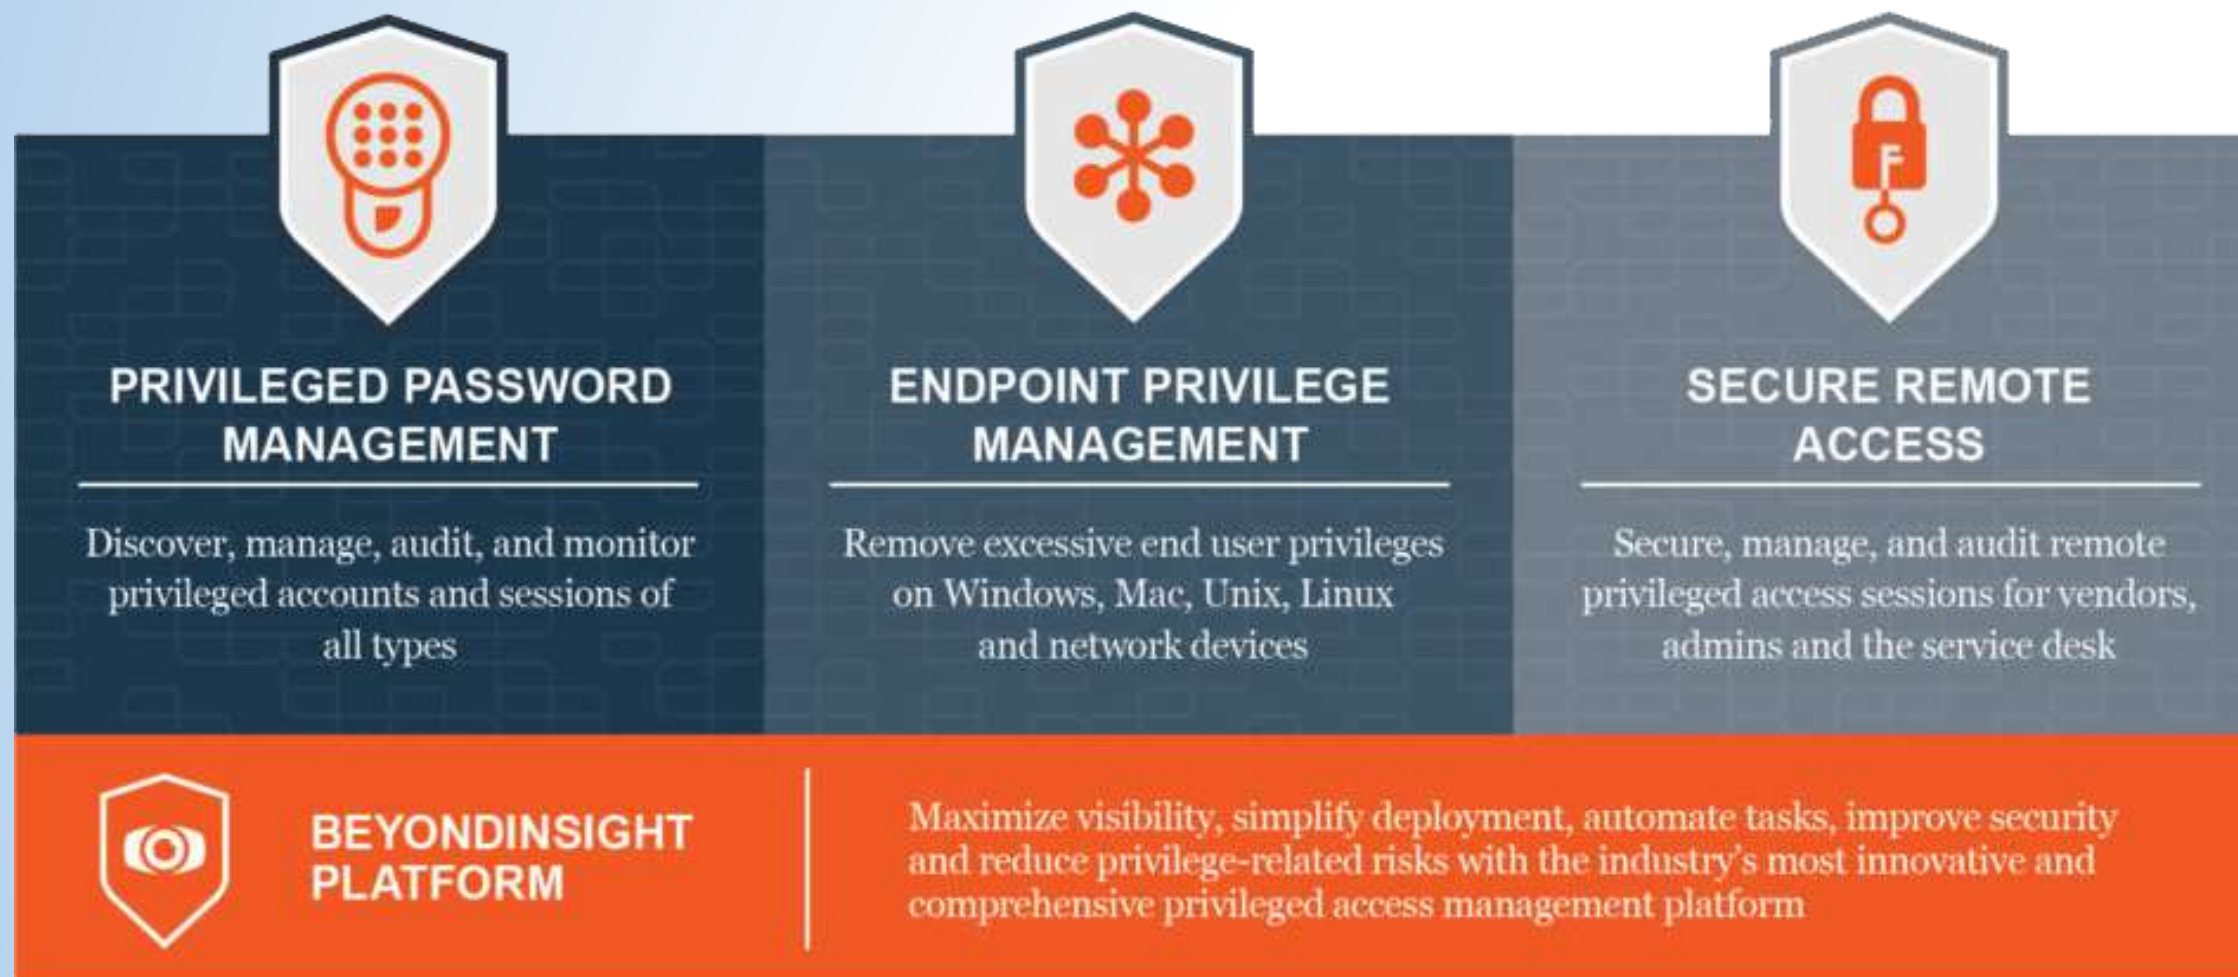

Sophos Security Products are working **Simple and** can be integrated, working together and being **Synchronized working together as One**

- Unified Security concept for all solutions
- Endpoint Security for Workstations & Servers
- Data Encryption for Media, Net Shares, Cloud
- Nextgen Web Security & Application Control
- Email Security & Data Leakage Protection
- Mobile Security for Phones & Tablets
- Support for all Operating Systems
- Synchronized Security and Analytics

Privileged Account Security

DISCOVERY - THREAT ANALYTICS - REPORTING - CONNECTORS - CENTRAL POLICY & MANAGEMENT

BeyondTrust Universal Privilege Management provides security to every user, asset, and session across your enterprise

- Scan, identify and profile all assets and accounts, providing full session recording and real-time visibility into privileged user behavior
- Eliminate unnecessary privileges and elevate rights to Windows, Mac, Unix, Linux and network devices without hindering productivity
- Privileged Remote Access allows you to secure, manage, and audit vendor and internal remote privileged access without VPN

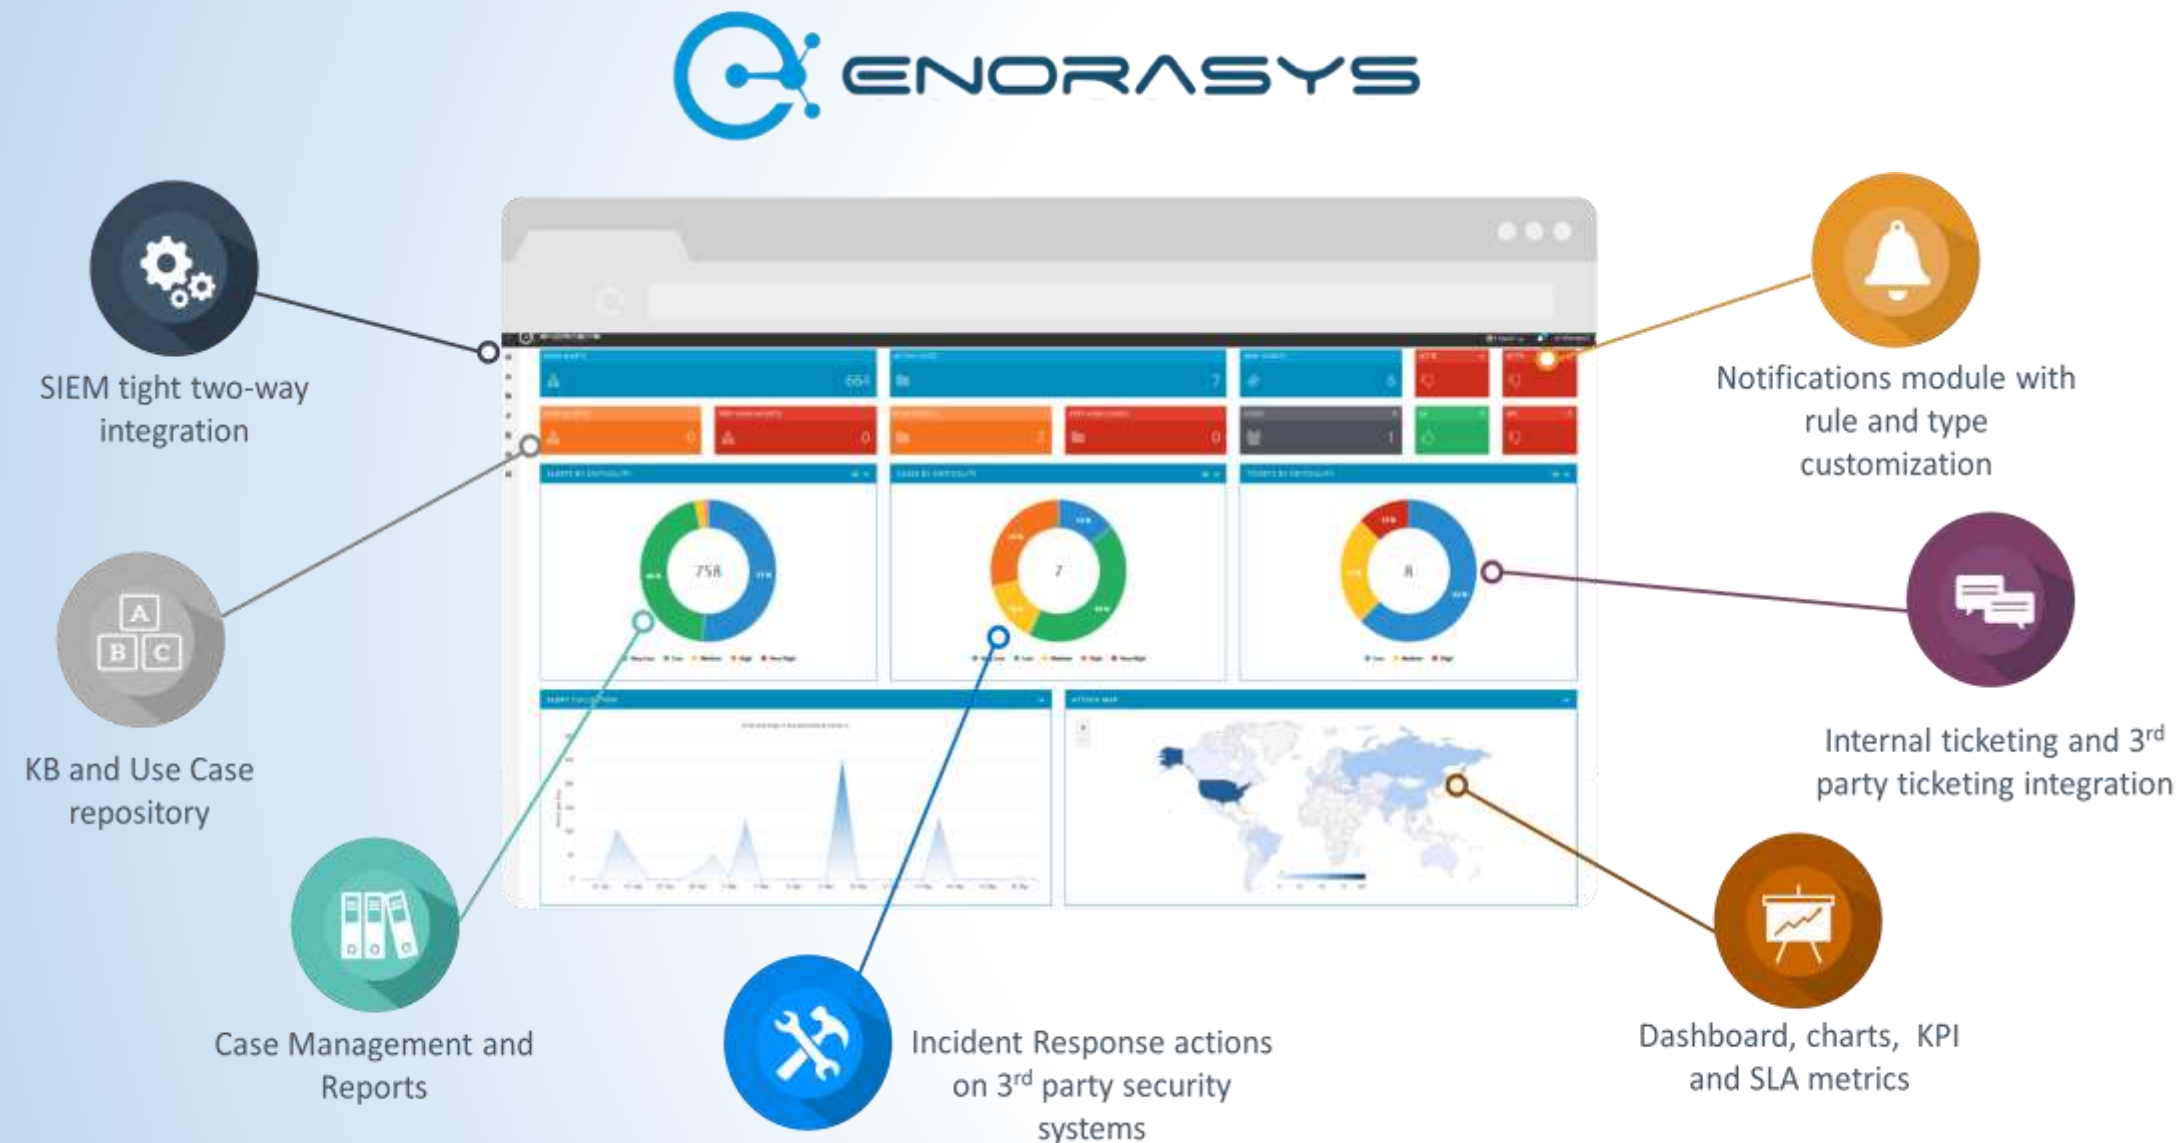

Smart Security on Demand

Trustwave helps businesses **fight cybercrime, protect data and reduce security risk**, using many integrated technologies and SpiderLabs research team

- Trustwave WAF delivers advanced, continuous protection for all Web applications.
- Trustwave Database Security solutions enable companies to secure their relational databases and big data stores with sensitive data.
- Trustwave NAC is a scalable solution designed to protect any network infrastructure, offering full protection for all endpoints.

Security Analytics & Response Orchestration

Enorasy is a Security platform enabling continuous **Situational Awareness and Targeted Response** to threats to advanced cyber threat attacks

- Enorasy SOCStreams is streamlining all core Security Operations Center (SOC) and Cyber Incident Response Center (CIRT) processes
- Enorasy Security Analytics delivers early compromise detection by analyzing the logic and exploitation paths of an attack
- Enorasy SIEM is a scalable solution for both log management and real time security analysis

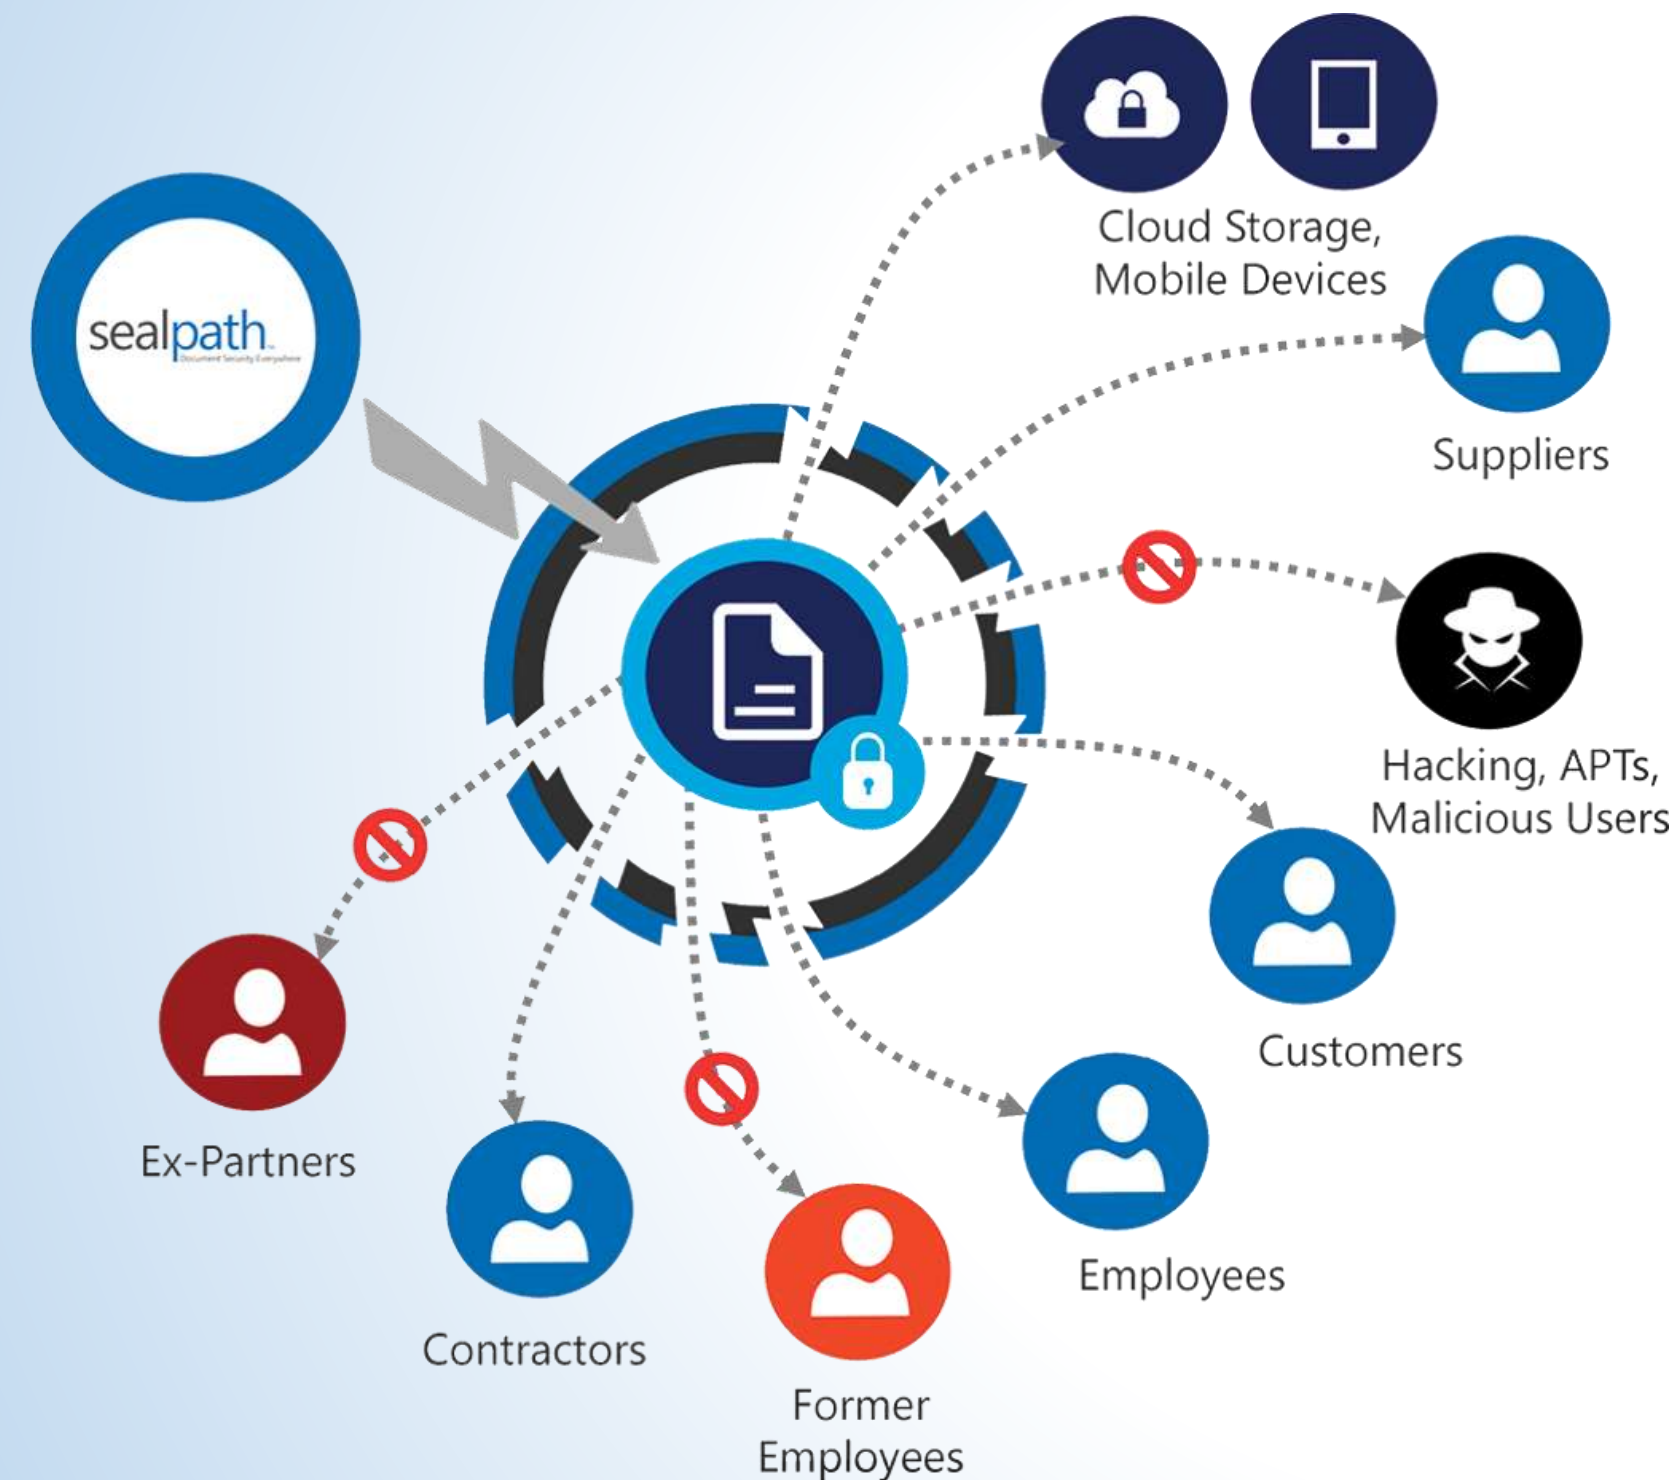

Document Classification

Using Boldon James **Data classification** companies can take decisions about how data is managed, protected and shared, both within and outside.

- ⦿ Improve data security awareness
- ⦿ Enforce corporate security policy
- ⦿ Identify and secure valuable data
- ⦿ Increase effectiveness of DLP & IRM
- ⦿ Demonstrate regulatory compliance
- ⦿ Empower users and transform company security culture

Document Security

SealPath allows companies to **Protect its Critical Documents** wherever they are without high costs or complex technologies allowing them to be controlled

- Protect critical and confidential documents
- Distribution & Access monitoring of documents
- Private data environment controlled globally
- Modify restriction policies dynamically
- Revoke access to the documents in real time, whenever & wherever they are

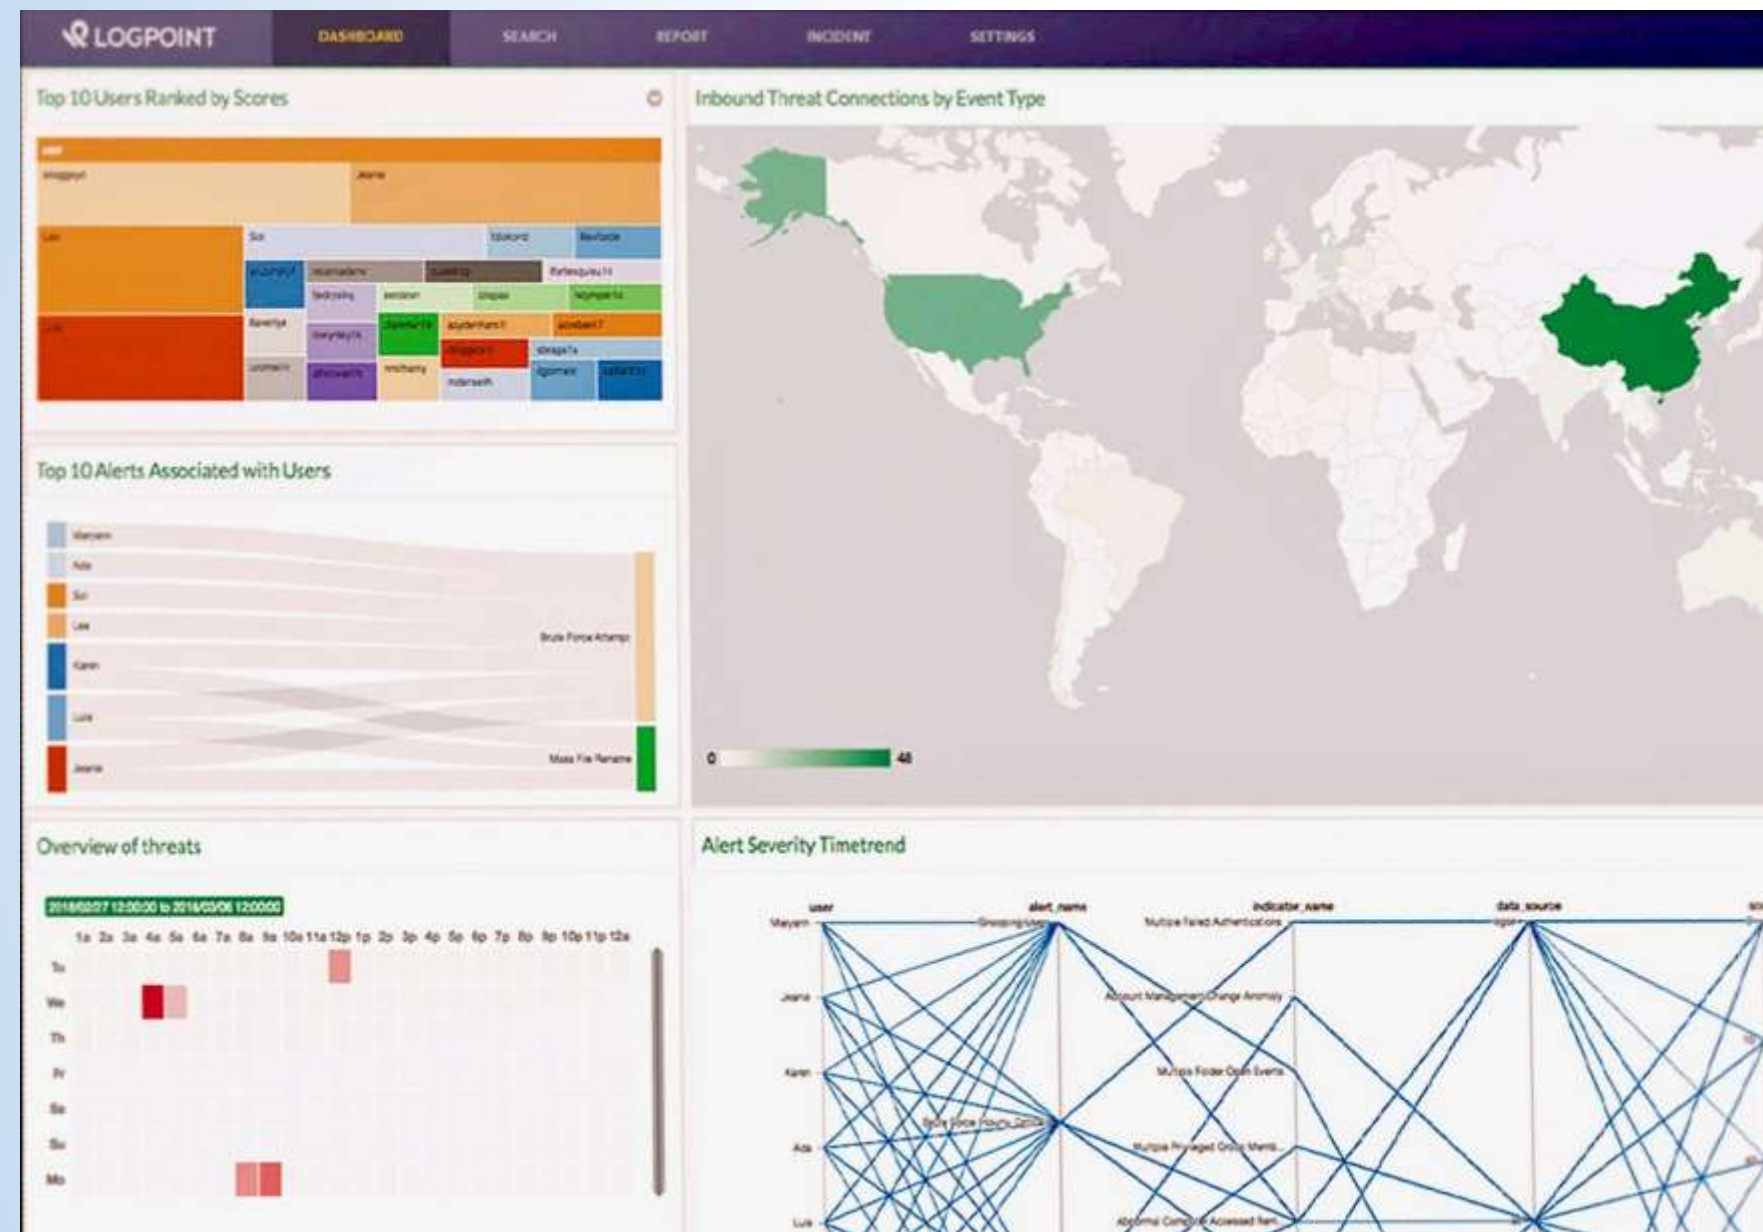

PKI Solutions & Identity Services

GlobalSign Identity and Security Solutions enable enterprises around the world to conduct secure online communications

- ◎ GlobalSign Certificates are trusted by any Browser, OS, Device and Application and are used for Server Identification, Digital Document Signing, Digital IDs, Timestamping etc.
- ◎ GlobalSign Access Control & Authentication Control which users, machines and devices can access corporate networks and services
- ◎ Code Signing certificates certify that a signed application is legitimate and comes from a known software vendor

SIEM & Log Management

LogPoint is a simple but super powerful **SIEM platform**, with a straightforward architecture, categorization and a simple search language

- Easy Integration & High Performance
- Supporting many Vendor Devices by Templates including Normalizations & Dashboards
- Complex Processing with Simple Methodology
- Easy deployment and Maintenance
- High availability, Scalability & Decentralization
- Affordable in Price

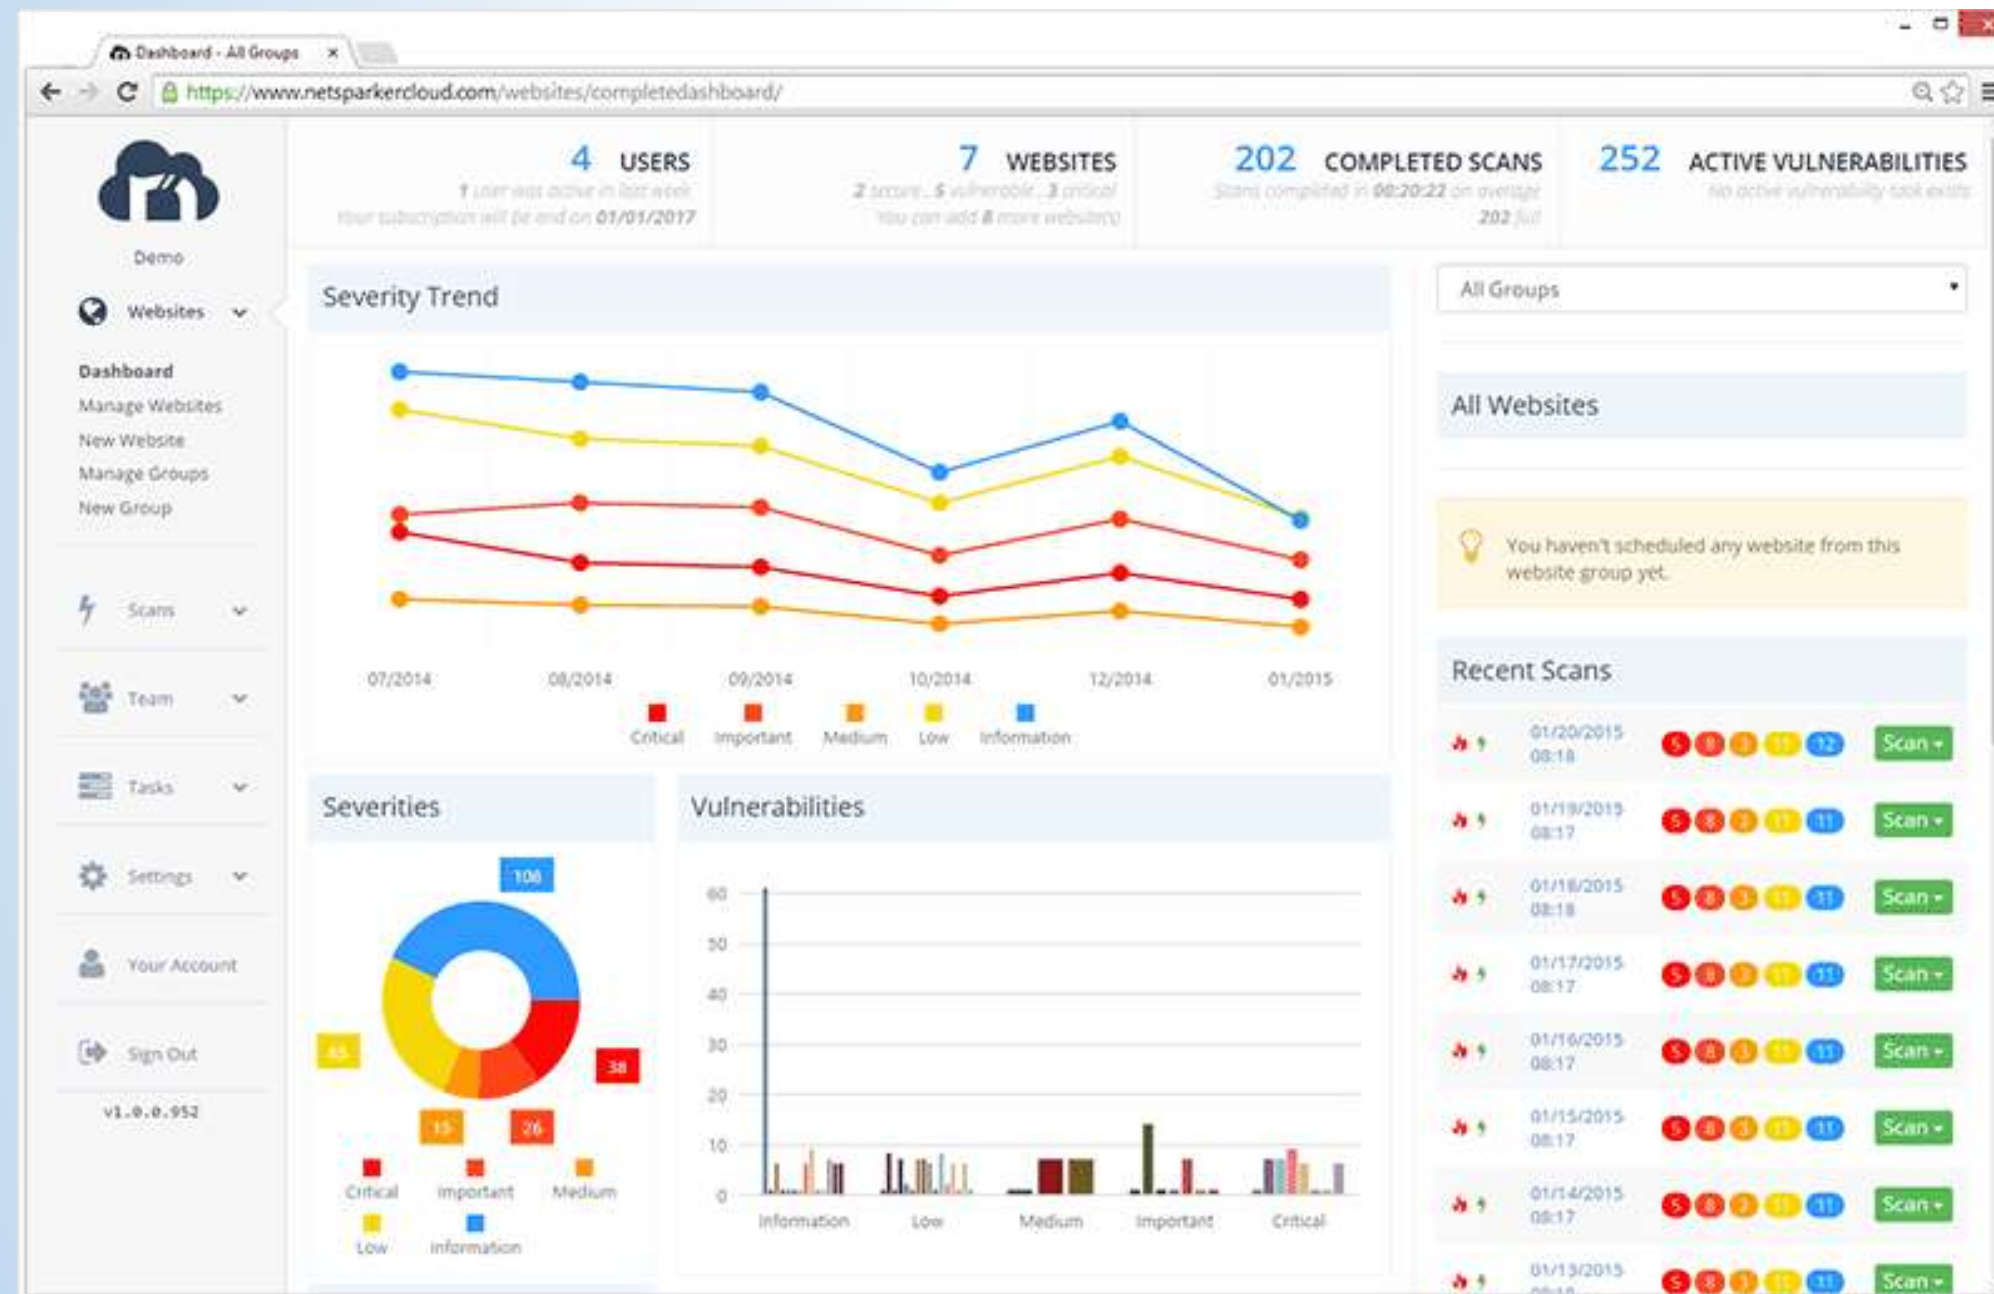

Vulnerability Assessment & Management

Acunetix believes that **vulnerability scanning** should be treated as part of the development and operational processes being your initial penetration testing tool

- Very effective web vulnerability scanner for websites, web applications and services
- Network security scanning to discover vulnerabilities in network devices
- Integration with manual tools like Kali Linux, Zed Attack Proxy (ZAP), w3af, Nmap, Metasploit, Wireshark, Burp Suite, sqlmap etc.

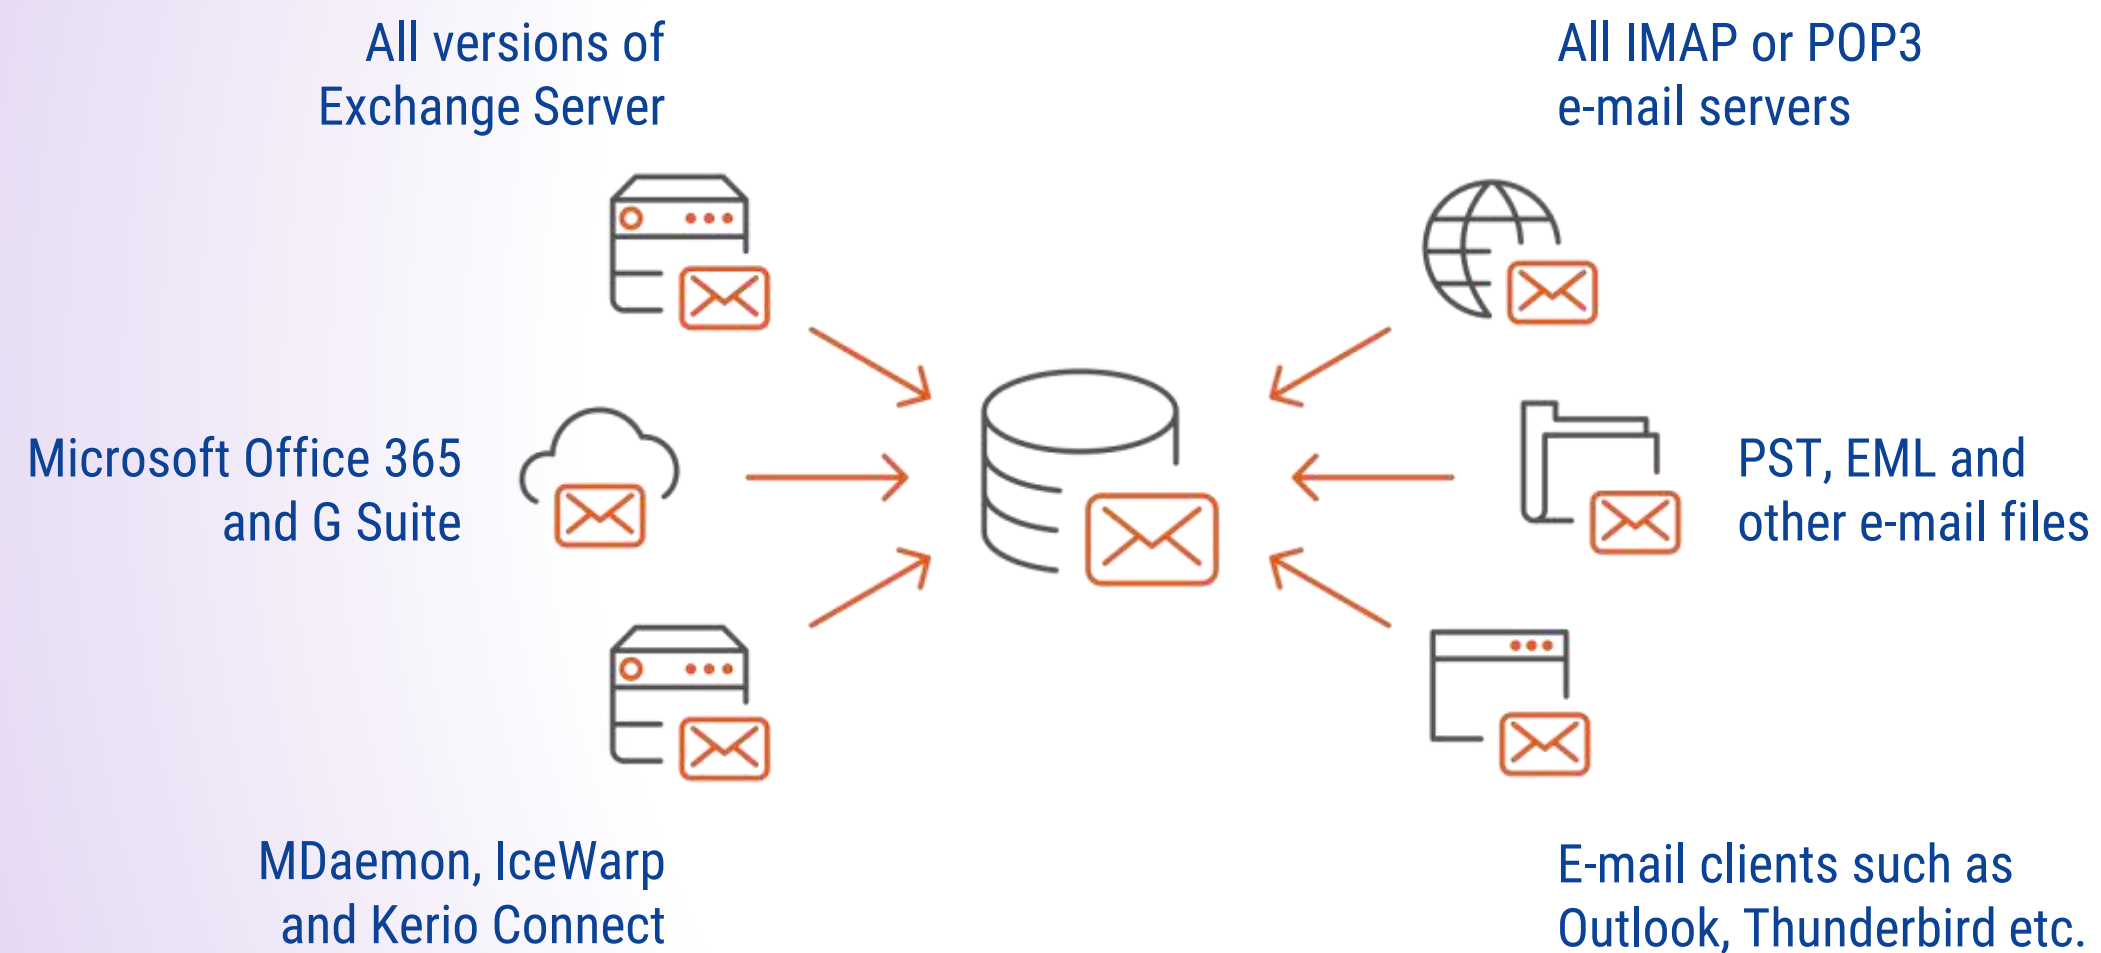

Web Application Security Scanning

Netsparker finds and reports **Web Application Vulnerabilities**, with unique and accurate Proof-Based Scanning Technologies producing a Proof of Concept to without false positives

- Fully automated (pre-scan and post-scan)
- Automatically detects security issues in websites, web applications and web services.
- Detects SQL Injection, Cross-site Scripting and other Web Application Vulnerabilities
- Provides vulnerability remediation solutions
- Easy deployment and Maintenance

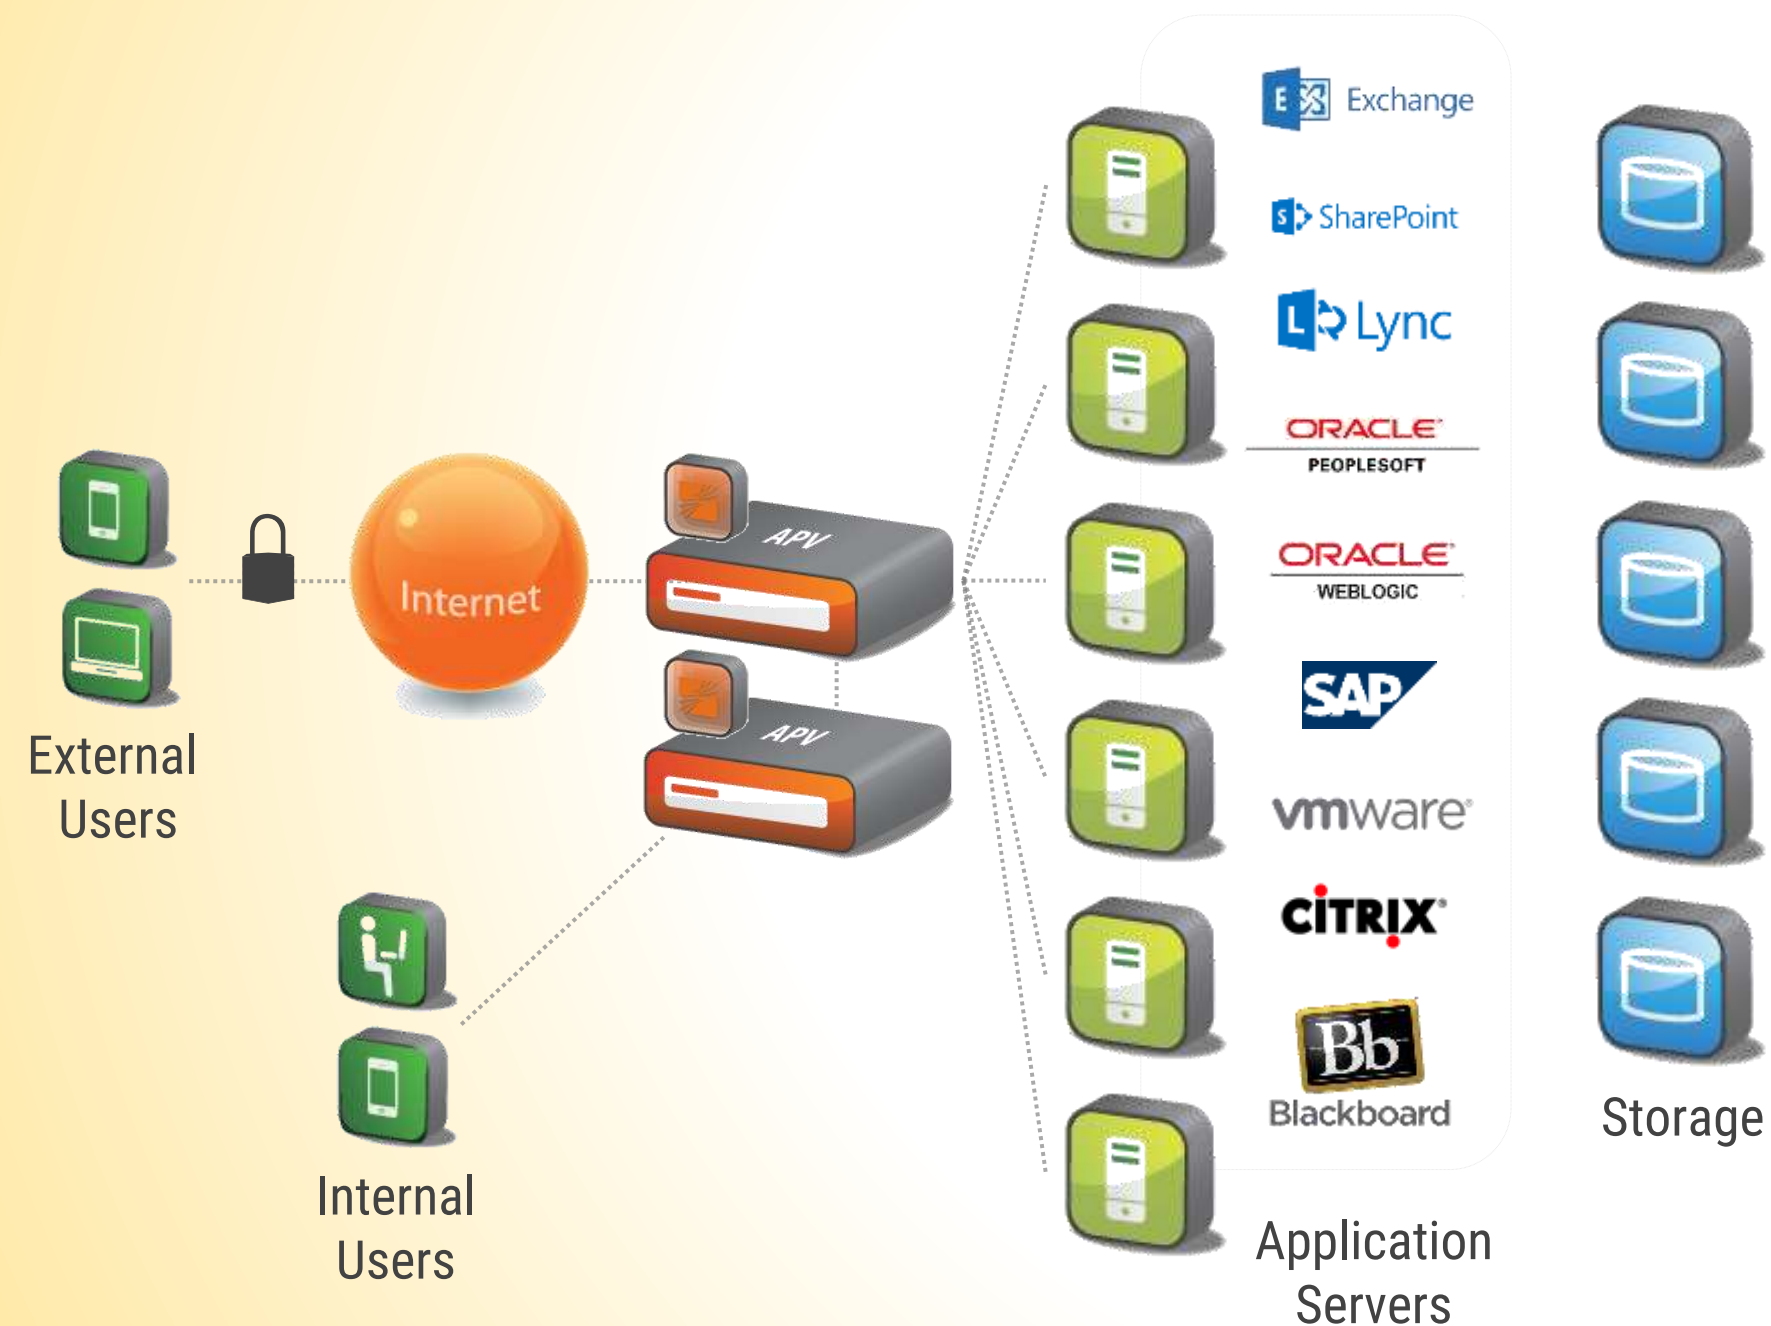

Email Archiving

Mailstore Email Archiving solution guarantees the security and availability of business sensitive data in your Emails for the years to come.

- Allows existing emails to be archived from different sources like existing mailboxes, email clients, PST files etc.
- Using deduplication to reduce the total storage requirements, saving up to 70% Storage Space
- MailStore Web Access allows users to easily access the archive from anywhere including mobile devices

Server Load Balancing, Secure GW, WAN Optimization

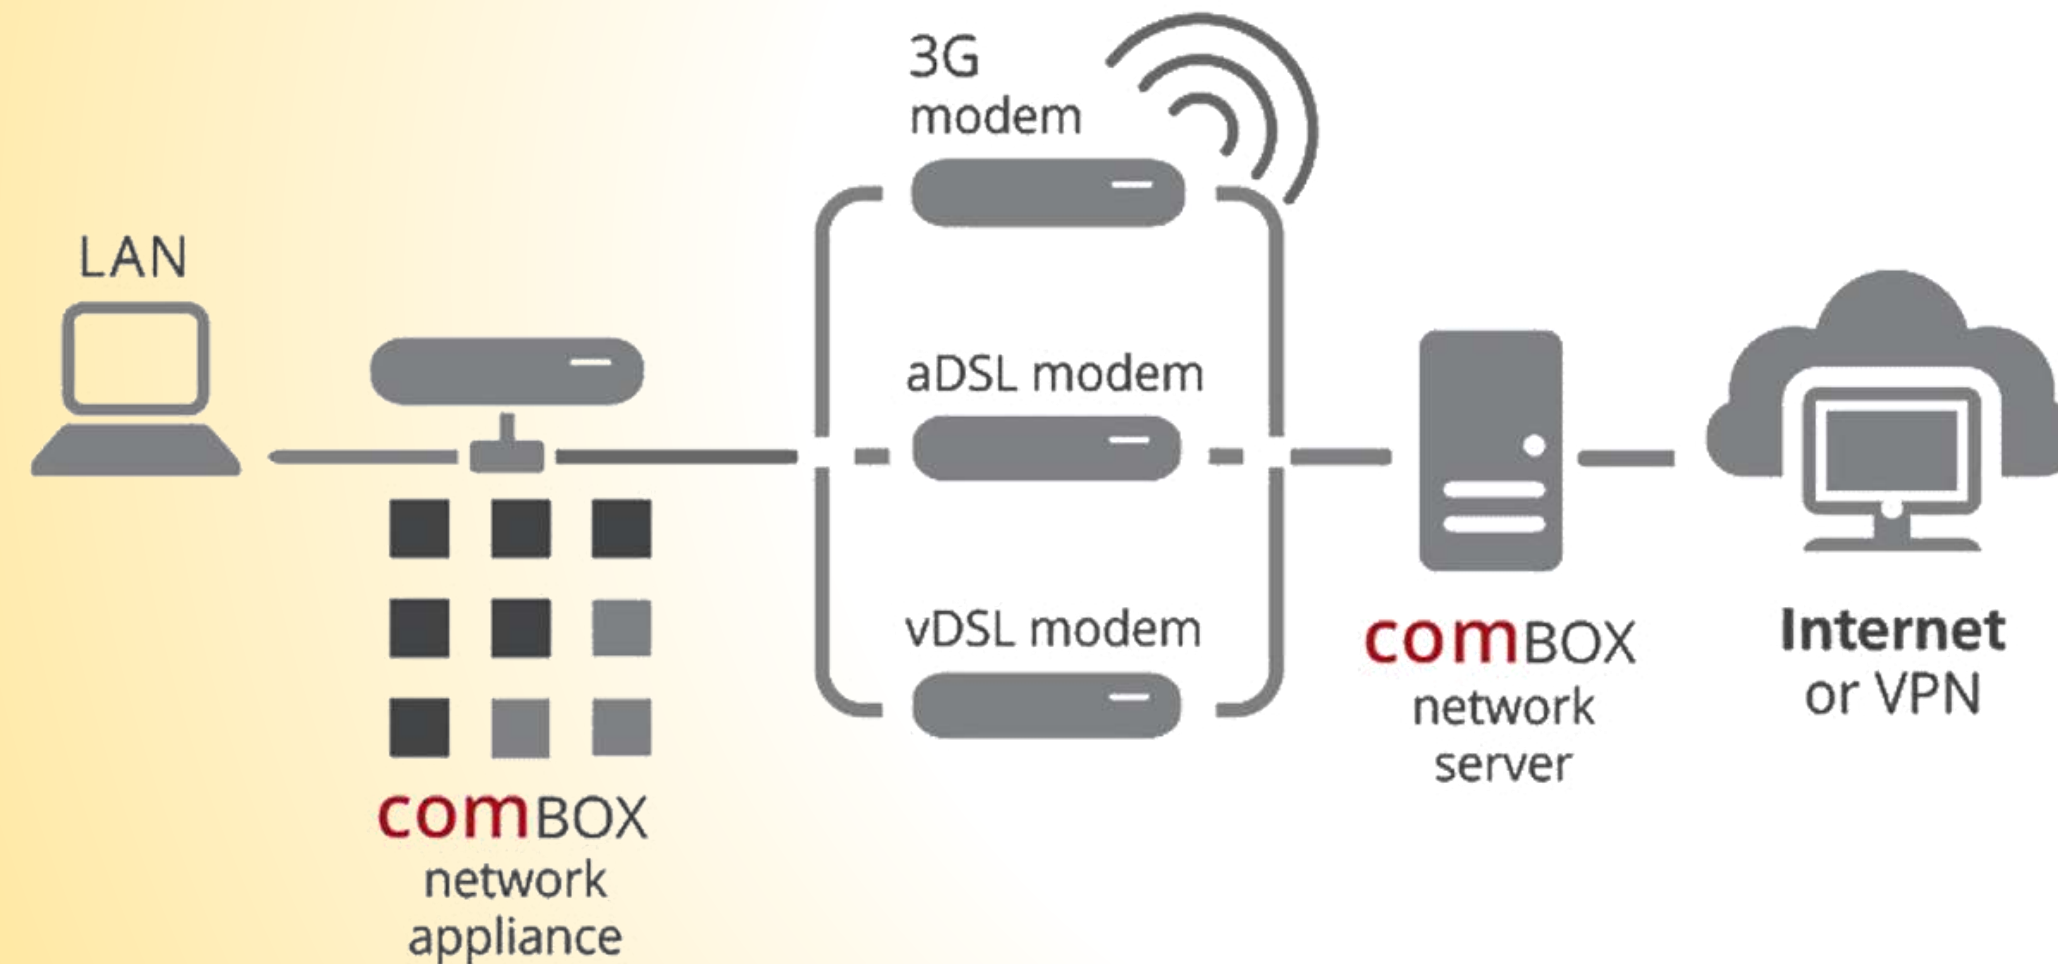

Array Networks creates **Network Optimization** solutions that can increase employee **Productivity** and business agility with dramatic cost savings

- Array's secure access solutions seamlessly connect personnel with the business applications they need to drive productivity and profitability
- Array solutions can easily adapt to meet the access requirements of any organization
- Vodafone, Humana, KDDI, Amdocs, ChinaCache, Morgan Stanley, Moody's KMV, CNN, Bank of New York, Bank of China and many others use Array

WAN Bonding & Cloud Connectivity

VLL Technology

comBOX Virtual Leased Line guarantees a single, optimized, uninterrupted connection to the Internet through bonding of all existing types of connections including DSL, Cell, Satellite etc

- Maximum reliability, speed & redundancy
- Adaptive self-tuning for traffic distribution
- Real-time data compression
- Adaptive TCP tuning
- Performance enhancing proxy (TCP split)
- Dynamic traffic shaping
- Advanced congestion control

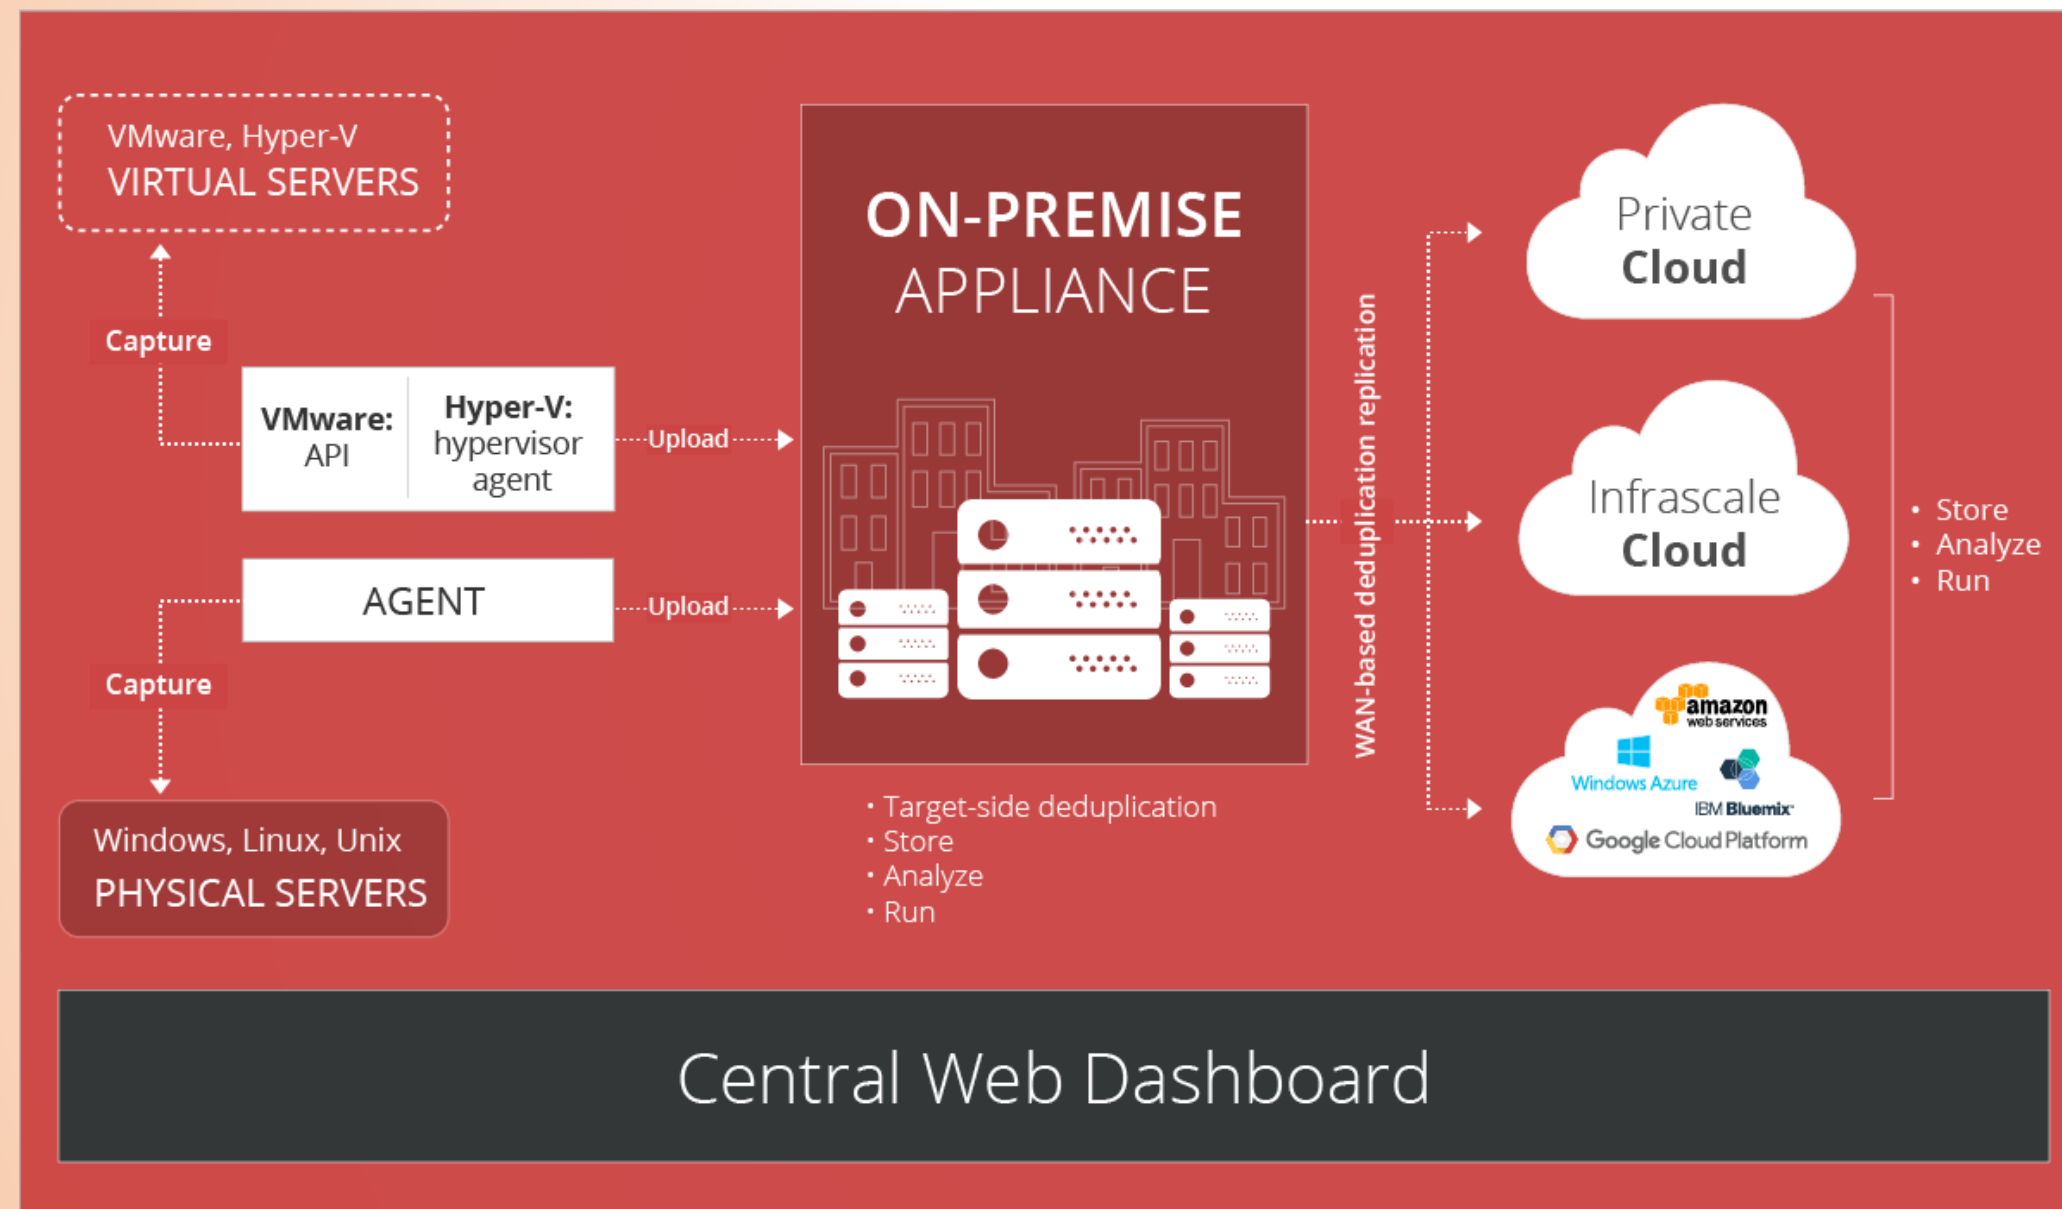

Link Load Balancing, Wifi & SDWAN

PePLink specializes in Internet redundancy, **WAN Link Load Balancing**, Failover, High Availability, Wireless and **Business Continuity** solutions

- PePLink Load Balancers enable the combination of multiple lower-cost internet connections
- All devices are easily managed and can be setup without deep knowledge of networking
- PePLink creates wireless mobility solutions for business or large city-wide deployments
- MediaFast Content Caching Technology enables on-the-fly content delivery and downloads.

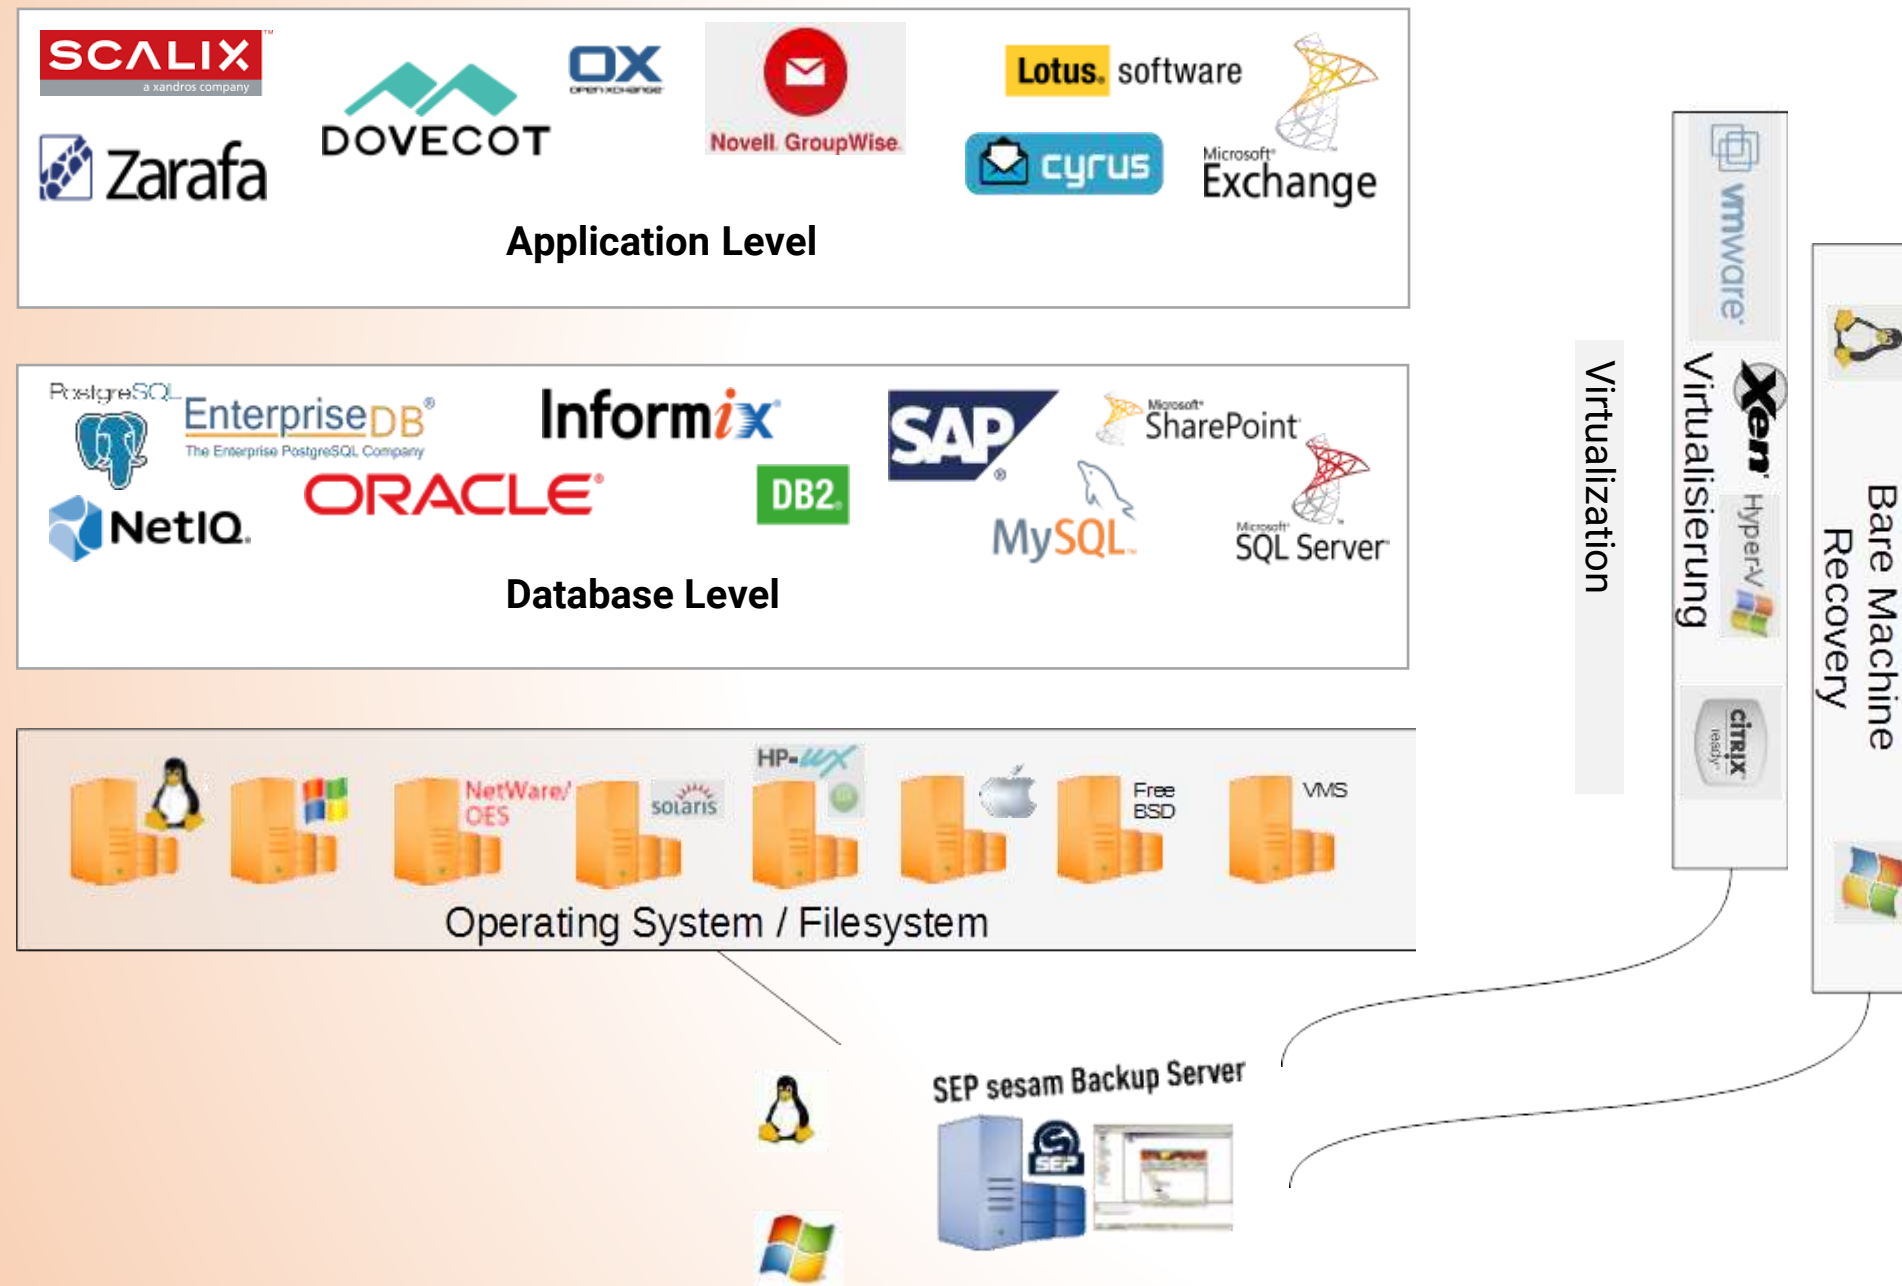

DR as a Service (DRaaS) & Cloud Backup

Infrascale solutions consist of Enterprise **Disaster Recovery** and **Cloud Backup** helping to mitigate the downtime caused by server crashes, ransomware attacks, or natural disasters.

- Platform Independent supporting Windows, Linux, UNIX, MacOS X and more
- Software Defined Networking
- Hybrid & Cloud Options
- Triple Layer Encryption
- Ransomware Mitigation

Physical / Virtual Backup & Disaster Recovery

SEP provides a comprehensive and highly **Scalable Backup and Disaster Recovery** solution, supporting all OS architectures of various sizes and diversity

- Platform Independent supporting Windows, Linux, UNIX, MacOS X and more
- Multi-Streaming Technology
- VMware, RHV, Hyper-V and Citrix Virtual Support
- Data Deduplication & Replication
- Supporting backup for Exchange, GroupWise, Lotus Notes, Scalix, Zarafa, OX and more
- Bare Metal Disaster Recovery
